Centavo UI Specifications

Status as of Oct 22 version.

1. What works now (unstyled)

- **Overview.** Live data: greeting with first name, total balance, accounts, budgets, 5 latest transactions. Placeholder widgets were removed on purpose. Don't style them. The page is one column now.
- **Accounts and Budgets.** Show live data. /accounts and /trends pages do not exist yet, so those sidebar links lead nowhere.
- **Transactions.** Newest first. 10 per page with pagination included. Filters for account and category. Summary: income, expenses, net savings. **"+ Add transaction"** opens a form for expense, income or transfer, needs styling.
- **Settings** (/settings, from the avatar top right, not in the sidebar). Profile tab: name and email, read-only. Categories tab: add and delete custom categories, plus a delete dialog when a category is in use (see section 2).
- **Ask Centavo AI Floating Chat.** A button on every page opens a chat panel. You type a transaction, the chat asks for anything missing, reads it back, and saves after a yes. Plain markup for now. The conversation extends as needed, so the floating chat needs to adapt. Follow current floating chat designs made by Steeve.

2. What needs design

- **Settings tabs** (Categories, Profile). Custom categories have a Delete button. Default categories are not listed.
- **Category delete dialog.** Overlay, centered panel, dropdown to move transactions to (includes "Uncategorized"), a count of transactions and budgets, and a warning. Cancel and Delete buttons. Amber warning when the budget moves, red when it is removed. Error text for duplicate names.
- **Add transaction dialog** (Transactions page). Type selector, amount, accounts, category (hidden for transfers), date, note. The balance line and error messages need a clear style.
- **Ask Centavo panel.** Desktop: floating panel over the page. Mobile: bottom sheet. Messages: the user's on one side, the AI's on the other. Input at the bottom with a Send button. Later it will also need a full-screen expand.
- **Single-column Overview page.** The right column is gone for now.
- **Sidebar and topbar.** Include the avatar slot top right. It is a link to /settings.

4. Data notes

- Negative balances use the red tone. A credit card balance is negative when you owe money.
- Expenses show a minus sign, income a plus. Net savings shows -$ when negative.
- Budget status: green under 85%, amber from 85% to 100%, red over 100%.

5. Coming later

- /accounts and /trends pages, and their styling.
- Chat: full-screen expand and mobile bottom-sheet behavior. The chat wording is still being tuned, but the layout will not change.
